Re: Utility Rates – Effective January 1, 2026

### **Executive Summary**

The Finance Department, with the support of the Utility Department, recommends increasing the utility rates for electric and sanitation effective January 1, 2026.

### **Discussion**

Municipally owned utilities are funded by ratepayer charges and are not subsidized by tax revenues. Therefore, rates set for use of the utility should generate adequate annual revenue to pay the costs of operation, maintenance, replacement of existing infrastructure, reserves for future capital needs, and required debt obligations. The proposed utility rate increases were reviewed by Council during a work session on September 15 with discussion and comments addressed at that time.

The utility rates currently in effect were set at the beginning of the current fiscal year which was January 1, 2025.

The electric utility rate proposal is an increase of 5% and the sanitation utility rate proposal is an increase of 4%. The water and sewer utility rates are proposed to remain at 2025 rates.

If utility rates are not approved, the current operating plan and capital improvement plan for the related utility will need to be revised. Operations will be impacted, but the extent of the impact would depend on the level of funding approved through rate increases.

### **Fiscal Impact**

Recommended rate increases will be sufficient to fund current levels of operations and necessary investment in utility infrastructure.
